Profile

Human-centered full stack developer and designer with over seven years of work experience. I actively participate in the development of shared tools and ways of working. On top of my day-to-day activities at work, I've introduced several methods and tools and developed tools that improve the quality of work at my place of employment. I am driven by an endless desire to improve, to learn new things, and to make the world around me a better place.

Work history

Web developer, Evermade Oy, Helsinki

June 2014 — Today
